Potential Enhancements

Wed, 2/28/01 Topics

- Potential Enhancements
- FLIS Stock List Price Updates
- ROMS

Potential Enhancements

Ideas for the Future

Plus Some Clarifications needed

Potential Enhancements

- Copy a TAB (all line items of an existing TAB to another new TAB within same DMISA)
  - Background: (CECOM 98 04AFTG, FY 2001, Exh II, copy TAB BB to new TAB LL - **91 line items**)
    - Air Force Principal needed to ‘copy an existing TAB’ to a new TAB and use exactly same line items as on the existing TAB within same DMISA. Principal would update requirements and TYAD (Army) Agent would update pricing after the copy, as needed.

Potential Enhancements - Copy TAB (Cont.)

- Offered customer option to use new Upload process to update requirements (using Principal's user ID) and pricing (using Agent's ID). (i.e., to do multiple line item updates at once).
- Upload Spreadsheet processes uses user ID role/privileges that are same for the DMISA
- Feasibility: How often does this occur?

Ideas for Potential Enhancements

- Send message to users (e.g., DMISA POCs) when production and transaction records are posted
  - Use current messaging system

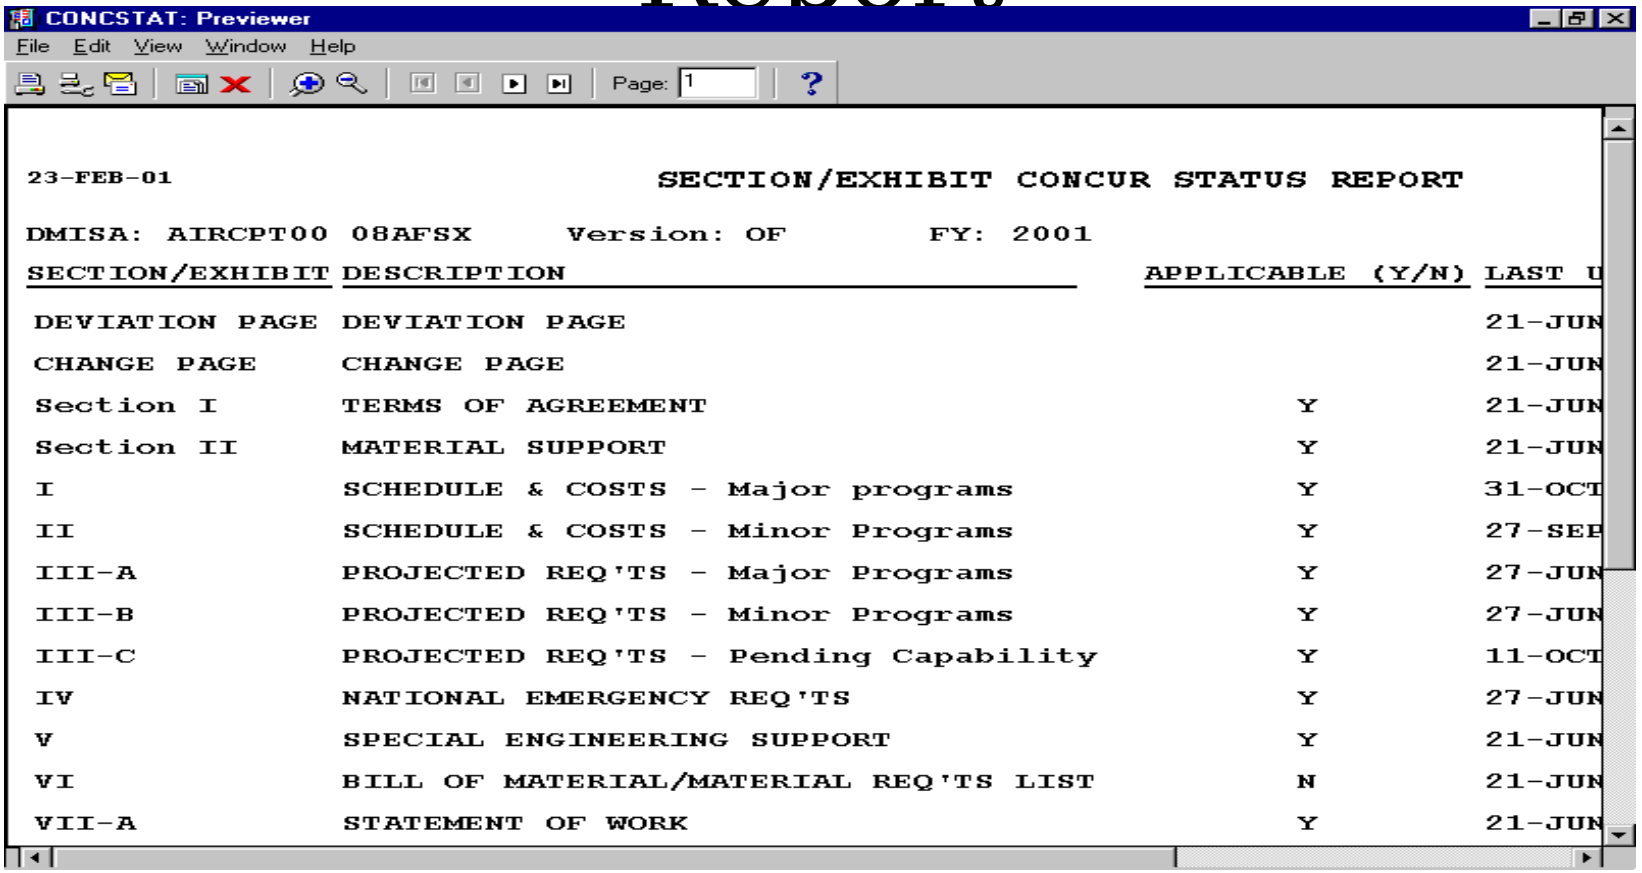
Ideas for Potential Enhancements

- Exhibit I/II spreadsheet
  - Add Part Number and CAGE
  - Add Option Omit Control Numbers

Potential Enhancements

- Section/Exhibit Concur Report
  - Suggestion: To have columns that show who has concurred (Principal/Co-Principal/Agent) and date when they concurred

Current - Section/Exhibit Concur Report



23-FEB-01 SECTION/EXHIBIT CONCUR STATUS REPORT

DMISA: AIRCPT00 08AFSX Version: OF FY: 2001

F WORK	Y	21-JUN-00	NOT CONCURRED

DR - Potential Enhancements

- DR 68911 - Change Boilerplate wording in Section 2 *(due to Regulation changes)*
  - If approved, only change wording for brand new DMISA? Principal update existing DMISAs as needed.
  - Do users need to update new wording in existing DMISAs?

DR - Potential Enhancement

- DR 68913 - IMACS Exhibits' reports are not set up to identify both a principal and a co-principal
  - Example: Show two fields instead of one for principal and co-principal sites - NAVAIR and NAVICP-P

DR Clarification - DMISA List Report

- DR- DMISA List report - End Date is sometimes blank or incorrect.
  - End Date Field - Current: When creating a New DMISA [not Copy DMISA], End Date is generated as 5 years out from Begin Effective Date.
  - Current Report Business Rules: Early termination of a DMISA displays the Termination date. Otherwise, the report shows the End date.
  - Discuss/Confirm: When copying a DMISA for the next FY, should the End Date still be another 5 years out?
    Or now 4 years out for the first FY's Copy (5-1=4 years left)? 3 years out for second FY's copy (5-2=3 years left), etc.?

DR- DMISA List Report - End Date

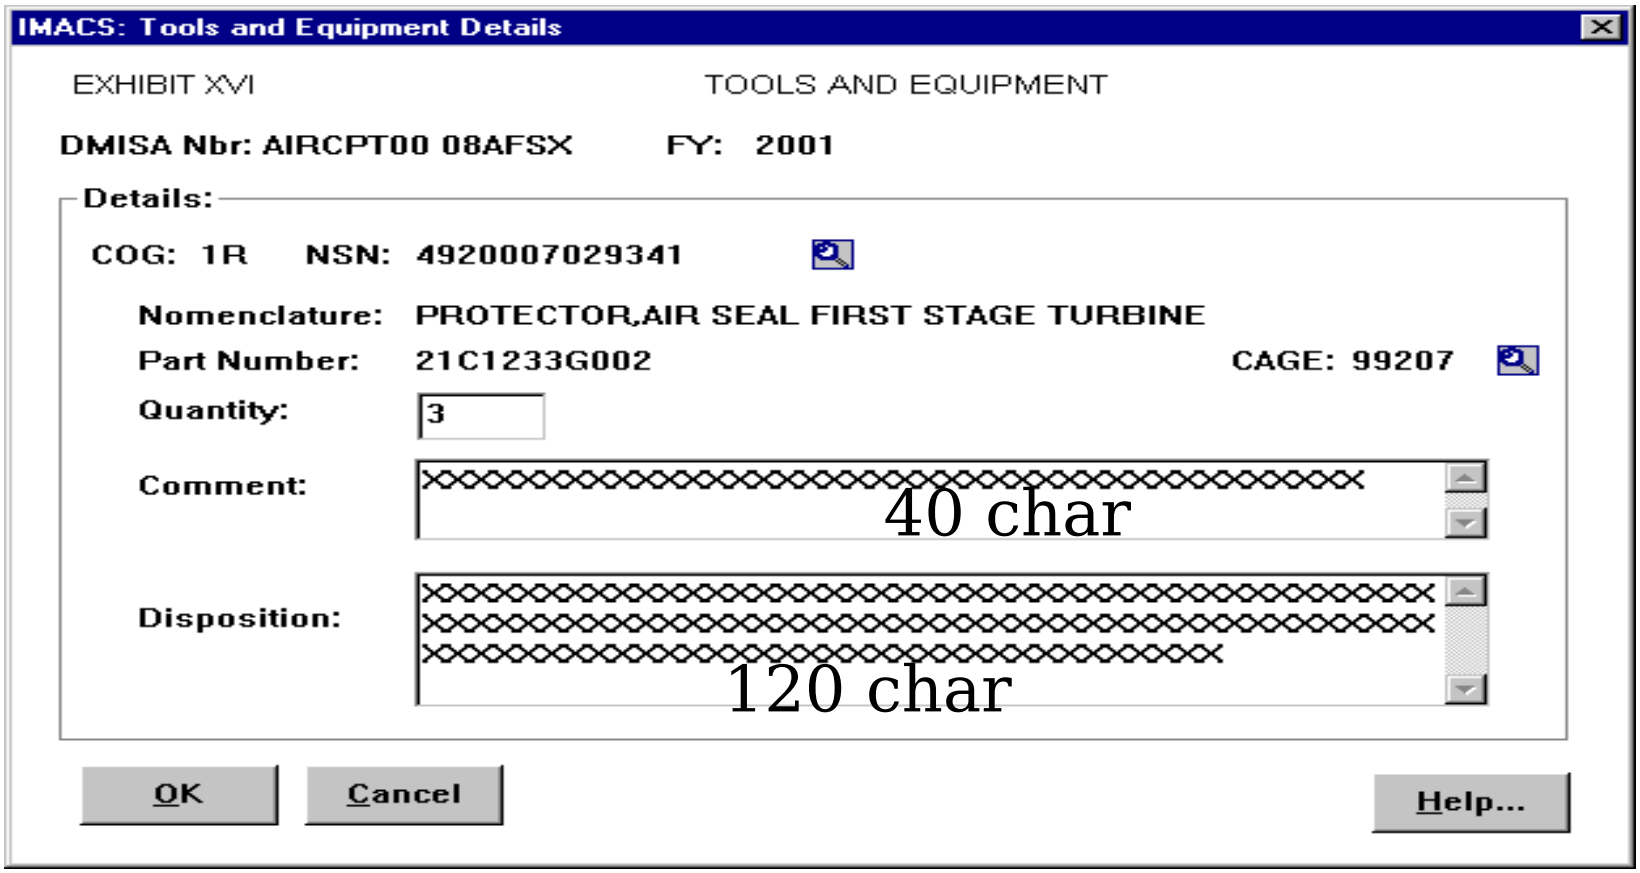
Action Item - Exhibit XVI ‘Comment’ field - Clarification

- Clarification Meet Me Call question…
  - Exhibit XVI ‘Comment’ field - needed to be extended??
  - Was this for ‘regular’ Comments (already 2000 characters allowed),
  - Or was it for ‘Tools and Equipment Details screen comment field (40 characters) for the specified NSN/Part Number?

Exhibit XVI ‘Comment’ field - Clarification



DR - Potential Enhancement - Possible Deferral

- Funding by TAB…
  - Would like to defer this until you see what we develop for the Funding portion of the Production rule relaxation enhancement

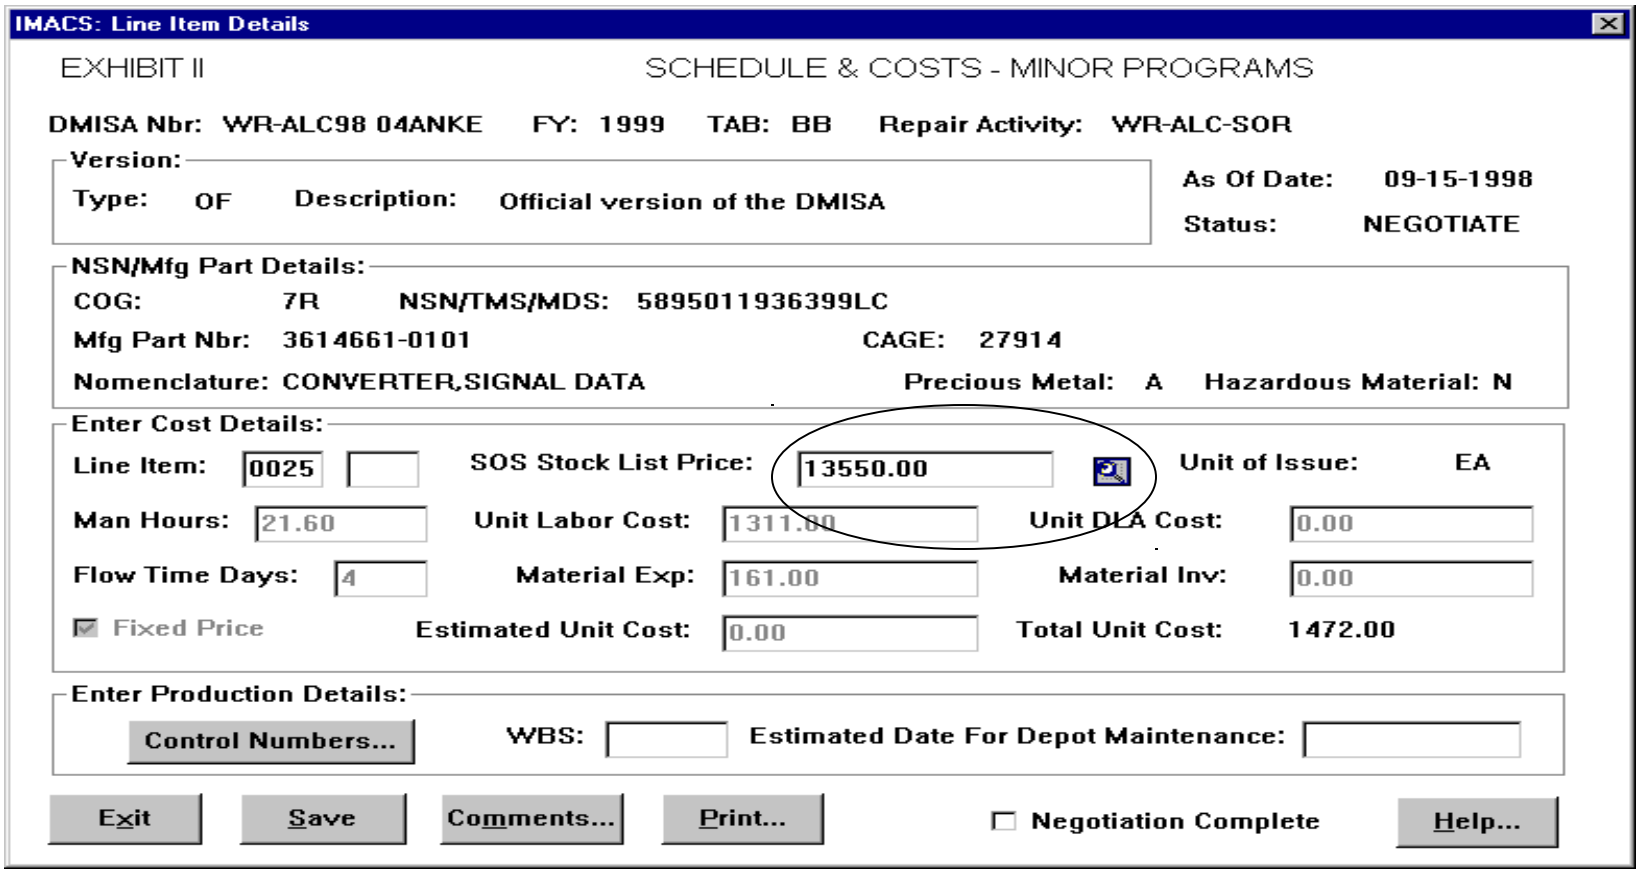
Principal Stock List Price Potential Enhancement

Discussion Points

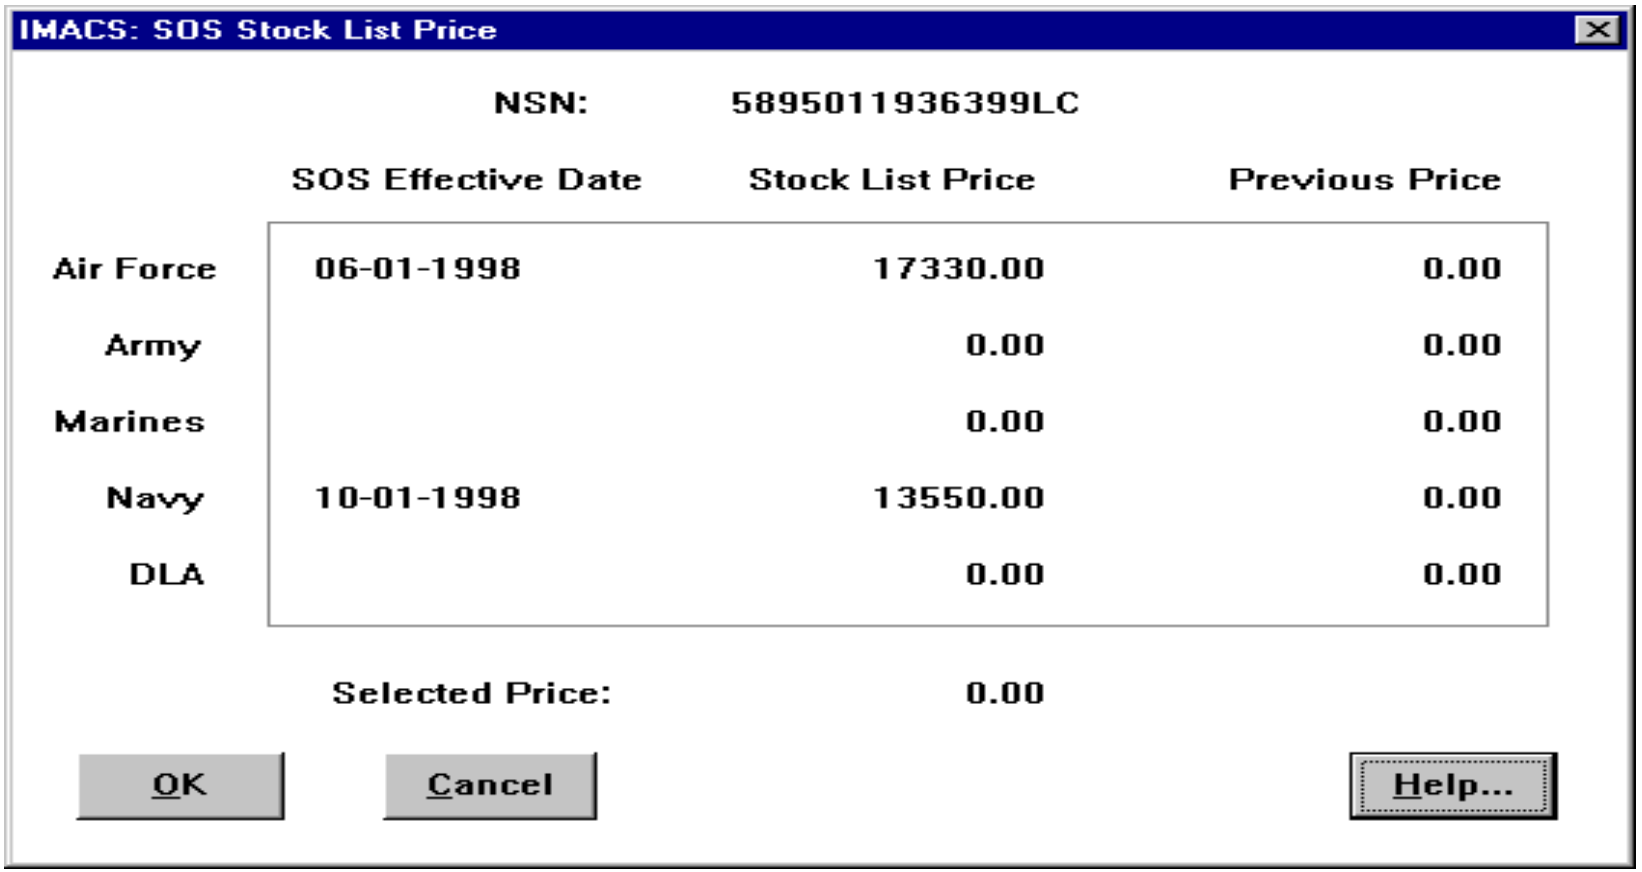
Potential Enhancements - Principal Stock List Price

- Principal Stock List Price for a line item
  - Current IMACS: Principal can select SOS Stock List Price from IMACS NSN global list [from FLIS] …Or, can manually enter desired Stock List Price.
  - Possible change: Have separate fields on Line Item Details screen for Principal to input desired SLP … and another field to show FLIS stock list price??
  - Previous discussion point: Automatically update SLP on DMISA line item when it changes in FLIS (i.e., thus updating Global list and DMISA)?

Principal Stock List Price Enhancement



Potential Enhancement - Principal Stock List Price



Maintaining Tab Data

- Combination of DR and Action item
  - DR 54738 - Virgil Wiley - When adding info to line items, system automatically reverts back to the first 12 lines…

  …And…

  - AI-29-Sacramento CMT -
    - Provide a NEXT option to go directly to next entry line and take cursor back to the entry...

Maintaining Tab Data (Cont.)

- Advantages…
  - To provide user with easier method of adding or updating multiple line items without having to return to Exhibit window and return to top of listbox every time
  - And, at least, be returned to where you left off in the list

New ROMs

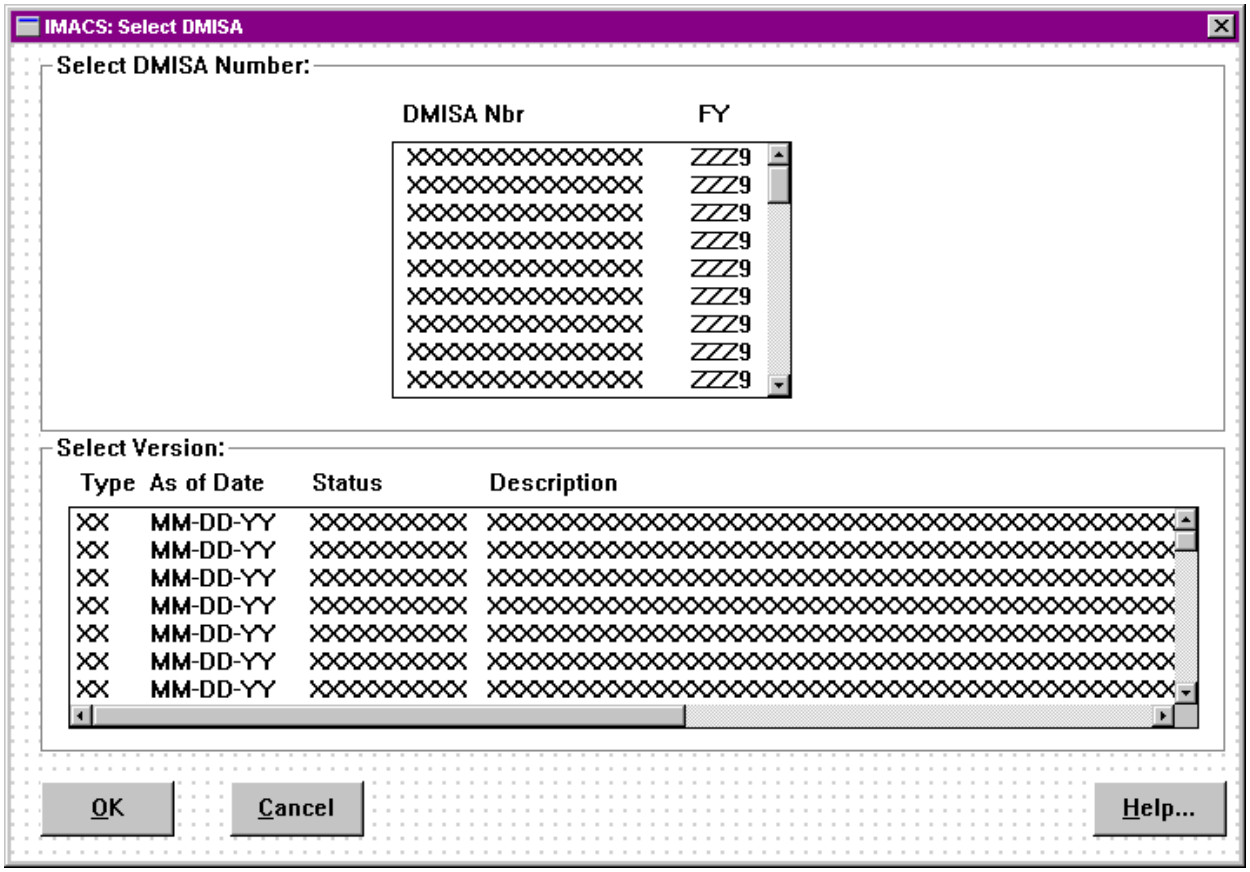
For Consideration

ROM

- DMISA List filter
  - Features four filters
    - Agent ID
    - Service
    - Principal Command
    - FY

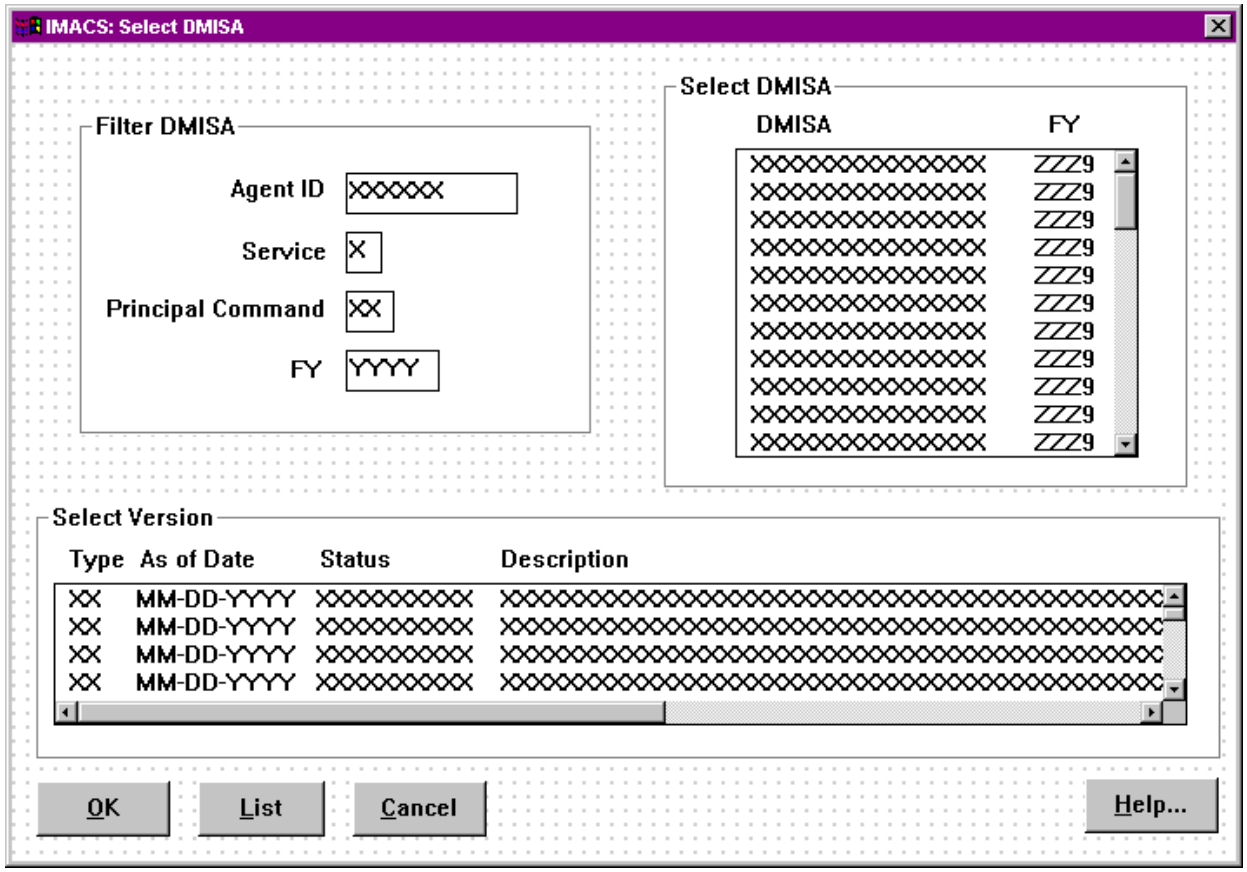
ROM - DMISA List Filter

- Current Select DMISA Screen



ROM - DMISA List Filter

- Modified Select DMISA Screen - DMISA Filters

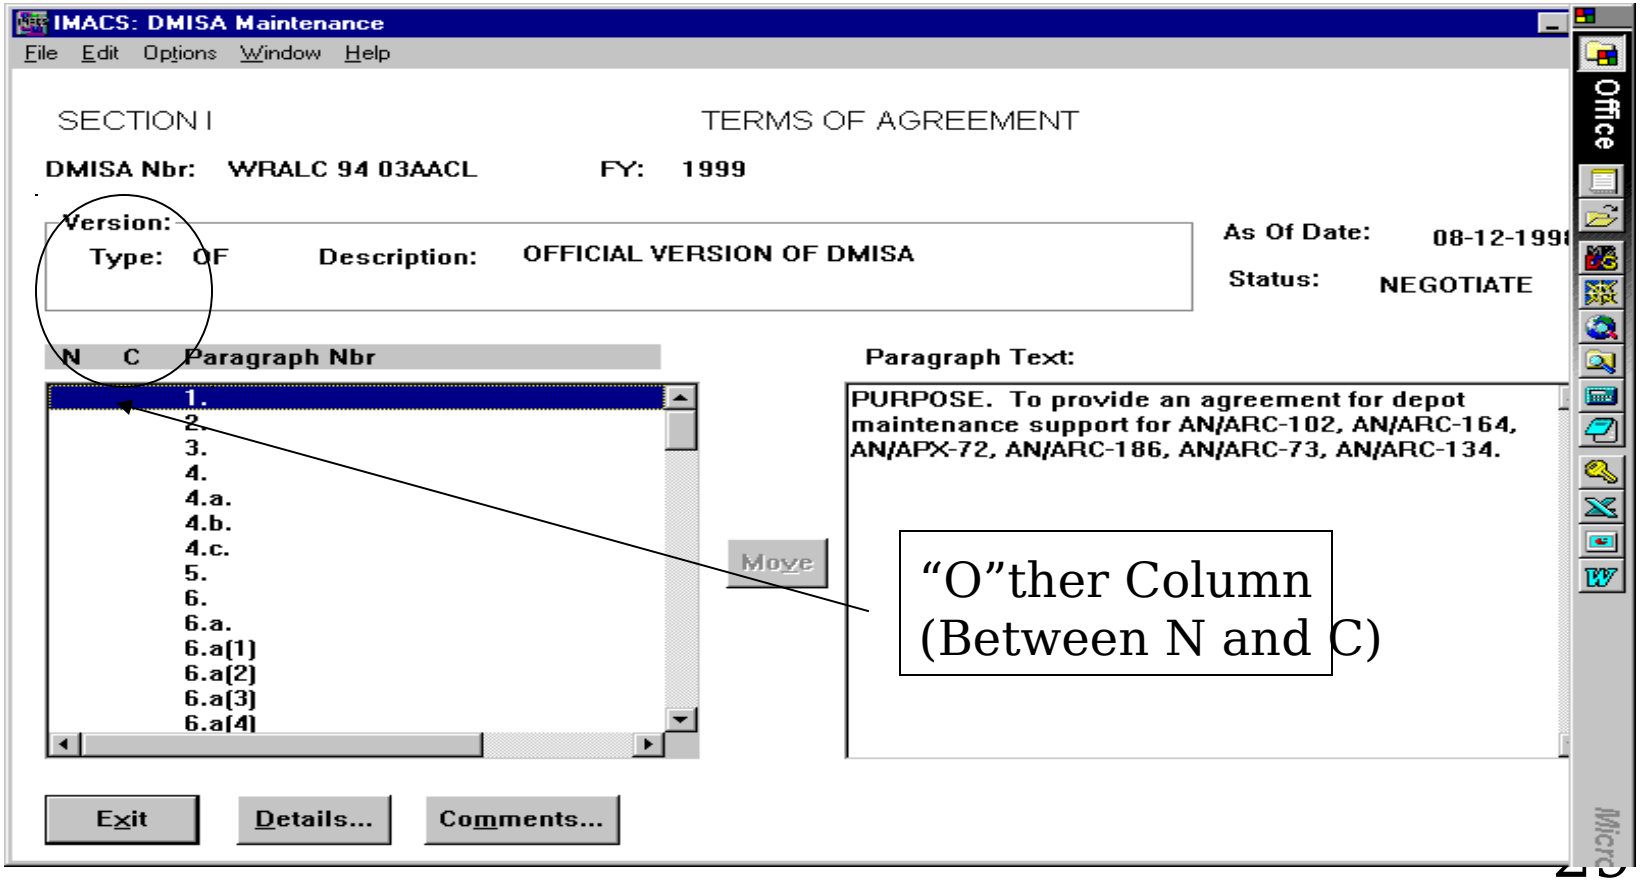


ROM - Free Text Exhibit

- Create an “*” next to a paragraph in Section 1 and 2 to show where Change and Deviation [or Permanent] comments exist for a given paragraph.
  - Similar to recently added “O” (Other) column in Exhibit I and II.
  - Only Online change needed. Deviation and Change comments print on respective Change or Deviation Page
  - ROM scope to provide “O” column for all Free Text exhibits, as well as Section 1 and 2

ROM - Free Text Exhibit

- Add “O”ther Column for Change, Deviation and Permanent Comments



ROM - Free Text Exhibit

- Applies to all Free Text (Paragraph) Exhibits
